

Kodi software update: Using "AppStarter" to update Kodi software

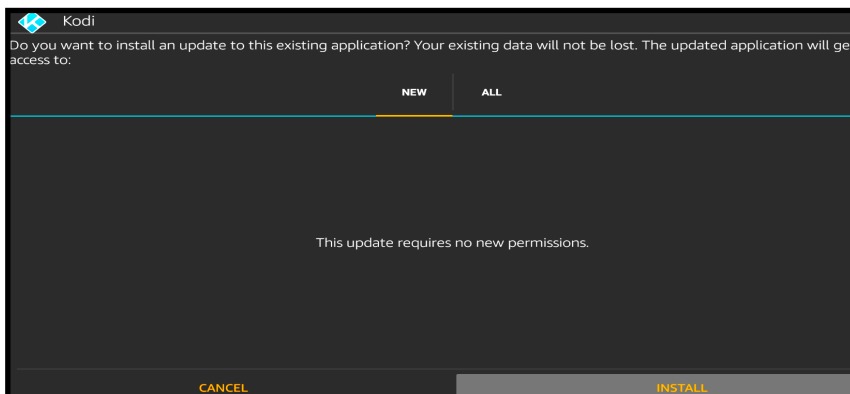

1. Reboot the Amazon device, go to "Settings" —> "Applications" —> "Manage Installed Applications" —> "AppStarter" —> "Launch application".

2. Go to "Updates" —> to the right of "Kodi" —> "Check for "Update"

3. Select "Update to latest Version" and wait for the download to complete. Then navigate to "Install", wait for the install to complete.

4. After the installation is complete select "Open", the Kodi Software update is complete.

Nice Work!!
